Word Chef Documentation
(v2.0)

1. Overview

Word Chef is a new type of the classic word search puzzle game. In this game, you are the chef, your duty is to find the right formulas to make great disks (Swipe to connect letters and build a valid word). It comes with 6 difficulties ranging from Beginner to Expert and there are 540 levels in total.

This game helps you reduce time to build a similar game. We are working hard to make more levels and update them in the next versions.

2. Requirement

Unity 5.5.3 or above.

3. Features

Game:
- 540 levels with 6 difficulties
- Source code is clean and professional.
- Easy to build on multiple platforms.

Plugin:
- Admob integrated
- In-app purchase integrated (Android, IOS, Windows Phone, Windows Store, Amazon, Mac)

4. Import project
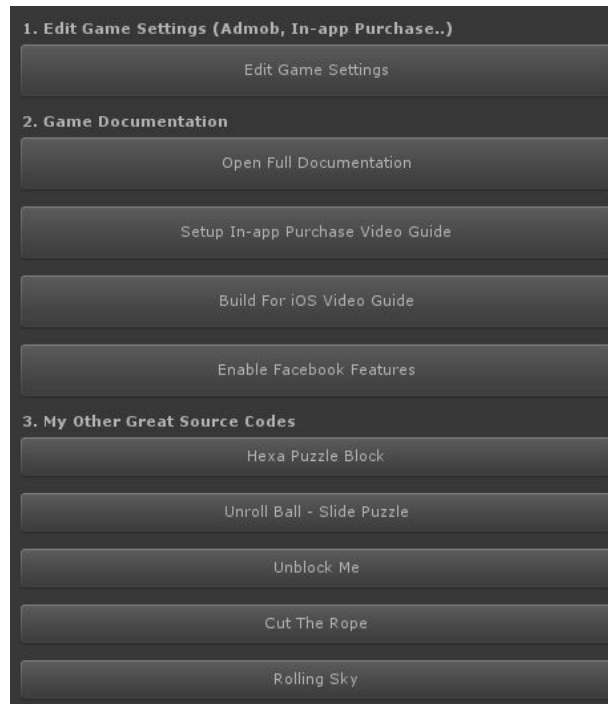

Open Unity 5.5.3 or higher, click "Open project" -> Choose "Word_Chef" folder.
Wait until the import process complete.

Important: Sometimes after opening the project in the first time, Unity has a bug that it miss some references. If you start the game and you can't hear music, you have to restart Unity. Restarting Unity solves the problem.

5. Configuration

Open Home scene in Assets/WordChef/_Scenes folder → Select Read_Meeee object to go over some important stuffs:

Click on "Edit Game Settings" button to change Admob id, package name id, in-app id …

6. **How to set up in-app purchase.**
